edited by:

Jin S. Chung, ISOPE, Cupertino, California, USA
Mohamed Sayed, National Research Council Canada, Ottawa, Canada
Hiroshi Saeki, Hokkaido University, Sapporo, Japan
Toshiaki Setoguchi, Saga University, Saga, Japan

presented at:

organized by:
International Society of Offshore and Polar Engineers

sponsored by:
International Society of Offshore and Polar Engineers (ISOPE)
with cooperating societies and associations

OFFSHORE TECHNOLOGY REVIEW

Trends in Offshore Safety on the Norwegian Continental Shelf
Gunnar Berge ................................................................................................................................................... 1

Terra Nova Design Challenges and Operational Integrity Strategy
A. Ewida and J.R. Kean ................................................................................................................................... 4

Development Options for Mobile Offshore Base Technology
Robert Zueck, Robert Taylor and Paul Palo ................................................................................................ 13
OFFSHORE TECHNOLOGY

SUBSEA

Autonomous Subsea Tie In System (AUSTIN) for Large Diameter Pipelines in Deep Waters
Jostein Aleksandersen, Ivar Langen, Morten Meling and Audun Lien ................................................................. 19

ARCOS Pipeline Repair System
Diego Lazzarin and Adalberto Colombo ............................................................................................................. 27

Increased Operability Subsea – More Accurate Tools for Installation and Intervention
Svein Ivar Sagatun and Øyvind Tveit ............................................................................................................... 32

Two Different Electrical Properties Can Improve Transoceanic Cable-Route Mapping
Jeff Wynn and Tim McGinnis ......................................................................................................................... 37

Pushing the Limits of Seismic Resolution in Deep Water
Thomas M. McGee and J. Robert Woolsey ..................................................................................................... 42

Aluminium Applied for Subsea Structures: Possibilities and Challenges
Christian Knutsen, Ivar Kvale and Jan Halvor Nordlien .............................................................................. 46

OFFSHORE SYSTEMS AND DECOMMISSION

Study on a System for Decreasing Vibration of a Hang Hook of Floating Crane
S. Shiraishi, T. Suzuki and T. Hiraishi, H. Kawahara, T. Horichi and N. Nishihara ...................................... 53

Spudcan-Footprint Interaction During Jack-Up Workovers
D.P. Stewart and I.M.S. Finnie ...................................................................................................................... 61

Sand Bed Response to Submerged Water Jet
T. O’Donoghue, B. Trajkovic and J. Piggins .................................................................................................. 66

An Integrated Approach for Fatigue Life Prediction of Whole Offshore Platforms
Yong-Ning Wu, Li-Song Song, Hua-Can Fang, Fa-Yan Xu and Meng-Lan Duan ...................................... 73

Characteristics of Tuned Liquid Damper for Suppressing Wave-Induced Vibration
Sheng Dong, Hua Jun Li and Tomotsuka Takayama ..................................................................................... 79

Experimental Investigation of TLD for Mitigating Wave-Induced Structural Vibration
Hua Jun Li, Sheng Dong and Tomotsuka Takayama ..................................................................................... 84

Criterion of Offshore Jacket Launching Analysis
Chul H. Jo, Kyung S. Kim, Jae H. Kim and S.H. Lee .................................................................................... 90

Experimental Investigation of a Model Jack-Up Unit on Clay
G. Vlahos, C.M. Martin and M.J. Cassidy ........................................................................................................ 97

Application of Probabilistic Models to the Response Analysis of Jack-Ups
M.J. Cassidy, G.T. Houlsby and R. Eatock Taylor .......................................................................................... 106

Structure Optimum Design of Offshore Jacket Platforms Based on Fuzzy Constraint
H.G. Kang, G.J. Zhai, X.B. Liu and F.C. Xu .................................................................................................... 114

Technical Issues in Platform Removal: Is OSPAR 98/3 Sustainable?
P. William Penney ........................................................................................................................................ 119

Managing the Challenges of Decommissioning with Technology, Research and Regulations
Sharon Buffington ......................................................................................................................................... 123

Weather-Dependent Operability for Offshore Single Lift Jacket Deck Removals
Birger J. Natvig, Øyvind Johnsen, Geir Grimsrud and Douglas Smith .............................................................. 129
GM-Lift Decommissioning and Installation Vessel
   J. Vatsvåg ...................................................................................................................................................... 136

Alternative Low-Cost Wellhead Platform Concept(s) for Marginal Offshore Field Developments
   H.J. Meek and P.G.F. Sliggers ..................................................................................................................... 142

Use of Light Weight Substructures for Oil and Gas Marginal Field Development
   Wan Mahmood Wan Ab. Majid and Mohamad Bin Embong ...................................................................... 149

OFFSHORE MECHANICS

MOB, MEGA FLOAT AND VLFS

Wave Response and Vibration Control of Flight Control Tower on the Mega Float Structure
   Y. Totsuka, H. Ishigaki, M. Kawarada, C. Sato, H. Eto and O. Saijo ........................................................ 154

Stress Analysis for Structurally Discontinuous Parts in a Mega Float Structure
   K. Kada, T. Fujita and K. Kitabayashi ........................................................................................................ 161

Effects of Breakwaters on Motions of an Elastic Floating Plate in Waves
   S. Nagata, H. Yoshida, H. Niiizato, Y. Ohkawa and K. Kobayashi .......................................................... 168

Variability of Water Quality Due to the Location of a Mega Float in Tokyo Bay
   Yusaku Kyozuka and Souichi Yamaguchi .................................................................................................... 176

Numerical Simulation of Tidal Current and Seawater Exchange Around a Very Large Offshore Structure
   Kazuo Nozawa and Masasi Toyooka ........................................................................................................... 183

Variational Principles Related to Motions of an Elastic Plate Floating on a Water Surface
   H. Isshiki and S. Nagata ............................................................................................................................... 190

Practical Natural Frequency Analysis of Elastic Plate on Water
   Hiroaki Eto, Koichi Maruyoshi and Osamu Saijo ....................................................................................... 198

Coordinated Dynamic Positioning of a Multi-Platform Mobile Offshore Base Using Nonlinear Model Predictive Control
   Jayesh Amin, Raman K. Mehra and Pablo Arambel ................................................................................... 206

SEABASE™, the Flexible Alternative
   Erik Pettersen ............................................................................................................................................... 212

Analysis of Drift Force on VLFS by the Near-Field Approach
   Tomoaki Utsunomiya, Eiichi Watanabe and Naoyuki Nakamura .............................................................. 217

Investigation of Draft Effects on Analysis of Hydroelastic Responses of Pontoon-Type VLFS
   Sa Y. Hong, Yoon R. Choi and S.W. Hong ................................................................................................. 222

The Motion of an Elastic Disk Floating on Shallow Water in Waves
   Takashi Tsubogo ........................................................................................................................................... 229

A Theoretical Approach to the Slamming Impact Pressure Acting on the VLFS
   Ken Takagi .................................................................................................................................................... 234

Tsunami-Induced Mooring Force on a Flexible Floating Structure
   Xiaodong Liu, Shigei Sakai, Shusaku Makino, Kota Hanai and Makoto Sasamoto ................................. 241
Transit Draft Roll Motion Stability Analysis of the Mobile Offshore Base (MOB) Using Time Varying Coefficients
Samrat Das and Jeffrey Falzarano ............................................................ 248

Transit Draft Heave Motion Analysis of the Mobile Offshore Base (MOB) Using Reverse MI/SO Techniques
William Rodrigues and Jeffrey Falzarano ................................................ 256

Wave-Induced Local Steady Forces on a Column-Supported Very Large Floating Structure
Masashi Kashiwagi .................................................................................... 264

Obtaining Accurate Modal Stress-Resultants in Freely Vibrating Plates that Model VLFS
C.M. Wang, Y.C. Wang, E. Watanabe, T. Utsunomiya and Y. Xiang .......... 272

Effect of Viscous Roll Damping on Drift Forces of Multi-Body Floating System in Waves
Yoshiyuki Inoue and M. Rafiqul Islam ..................................................... 279

Air Gap Model Tests on a MOB Module
David Kriebel and Louise Wallendorf ..................................................... 286

Nonlinear Dynamic Responses of a Large Offshore Structure
Kenji Kawano and Tutomu Hashimoto .................................................... 294

FPSO, TLP AND SPAR
Extreme Response and Fatigue Damages for FPSO Structural Analysis
Chuntian Zhao, Yong Bai and Yung Shin ................................................ 301

Experience and Risk Assessment of FPSOs in Use on the Norwegian Continental Shelf: Descriptions of Events
Roger L. Leonhardsen, Gerhard Ersdal and Arne Kvitrud ................. 309

Floating Production System for the Shtockmanovskoye Gas/Condensate Field
Victor M. Potapov, Lev B. Blagovidov and Vladimir V. Minin ............... 315

Coupled Dynamic Response of Moored FPSO with Risers
J.M. Heurtier, P. Le Buhan, E. Fontaine, C. Le Cunff, F. Biolley and C. Berhault ...................................................... 319

Turret Operations in the North Sea: Experience from Norne and Åsgard A
Børre Knudsen, Bård A. Leite and Stig A. Mjøen .................................. 327

Nonlinear Dynamics of a FPSO and Shuttle Vessel in Tandem Configuration
Helio Mitio Morishita, Jessé Rebello de Souza Junior and Claudio Gomes Fernandes .............................. 336

Numerical Multiple-Body Simulations of Side-by-Side Mooring to an FPSO
Bas Buchner, Adri van Dijk and Jaap de Wilde .................................... 343

Structural Design of the Truss Spar — An Overview
J. Wang, S. Berg, Y.H. Luo, A. Sablok and L. Finn ............................... 354

Time-Domain Fatigue Analysis for Critical Connections of Truss Spar
Y.H. Luo, R. Lu, J. Wang and S. Berg .................................................... 362

Theoretical Analysis and Experimental Evaluation of the Fishtailing Phenomenon in a Single-Point Moored Tanker
Alexandre N. Simos, Eduardo A. Tannuri, José A. P. Aranha and André J.P. Leite ........................................... 369

Global Strength Evaluation for a Medium-Sized Semi-Submersible Drilling Rig
Seock-Hee Jun, Yeong-Pyo Kim, In-Hwan Sim and Joo-Ho Heo ............. 375
Automated Hull Optimisation of Offshore Structures Based on Rational Seakeeping Criteria
L. Birk and G.F. Clauss .......................................................... 382

Airgap Prediction: Use of Second-Order Diffraction and Multi-Column Models
Bert Sweetman, Steven R. Winterstein, Trond Stokka Meling and Jorn Birknes ............................................. 390

Model Experiments on Dynamic Positioning System with Steerable Thrusters
Masahiko Nakamura, Hiroyuki Kajiwara, Wataru Koterayama and Toru Komaru ........................................... 398

Diffraction and Radiation of Waves Around Side-by-Side Moored Vessels
R.H.M. Huijsmans, J.A. Pinkster and J.J. de Wilde .......................................................... 406

Nonlinear Time-Domain Analysis of Compliant Offshore Structures by a Semi-Implicit Strategy
M.V. Rodrigues and B.P. Jacob .......................................................... 413

Upending of a Spar Offshore Platform: Prediction of Motions and Loading
Igor Prislin, Atle Steen and John Halkyard .......................................................... 421

Effect of Ramp Duration on the Dynamic Response of Spurs
Iftekhar Anam and Jose M. Roesset .......................................................... 427

Buoyant Leg Structure Preliminary Design, Constructed Cost and Model Test Results
C.B. Shaver, C.C. Capanoglu and C.S. Serrahn .......................................................... 432

Nonlinear Response of ISSC TLP in High and Steep Random Waves
Z.M. Wang and C.H. Kim .......................................................... 440

Directional Sea Response of a Mini-TLP

Wave Interaction Effects for Non-Compliant TLP
P. Teigen, J.M. Niedzwecki and S.R. Winterstein .......................................................... 453

OCEAN RESOURCES AND ENERGY TECHNOLOGY

GAS HYDRATES

Global Occurrences of Gas Hydrate
Keith A. Kvenvolden and Thomas D. Lorenson .......................................................... 462

Density Change of CO₂-Dissolved Water in Hydrate Forming Region
R. Kojima, K. Yamane and I. Aya .......................................................... 468

Martin Hovland, Dan Orange, Per Arne Bjørkum and Ove Tobias Gudmestad .......................................................... 471

Two Phase Flow Dynamics for Production of Methane Hydrate
Y. Kobayashi .......................................................... 477

A Remote, Multi-Sensor Station to Monitor Conditions Near the Sea Floor within the Hydrate Stability Zone
J. Robert Woolsey, Thomas M. McGee and Robin C. Buchanan .......................................................... 483

Numerical Simulation of Agglomeration of CO₂ Droplets Covered with Hydrate Film

Unexpected Natures of CO₂ Hydrate Membrane in Saturated Water: An Explanation by the Free Water Molecule Model
I. Aya, K. Yamane, R. Kojima, T. Yamamoto and H. Nariai .......................................................... 495
Droplets of Dry Ice and Cold Liquid CO₂ for Self Transport of CO₂ to Large Depths
Bjørn Kvamme .............................................................................................................................................. 498

Kinetics of Hydrate Formation from Nucleation Theory
Bjørn Kvamme .............................................................................................................................................. 508

Molecular Dynamics Simulations as a Tool for the Selection of Candidates for Kinetic Hydrate Inhibitors
Bjørn Kvamme .............................................................................................................................................. 517

OCEAN MINING
Resedimentation Analysis from Seafloor Photographs
T. Yamazaki, E. Kuboki and D. Uehara ...................................................................................................... 528

Dynamic Positioning Control for the Buffer of a Deep-Sea Mining System Using FIR Filter
Ki H. Kim, Hang S. Choi, Woo J. Seong and Kyu Y. Lee ............................................................................ 536

Chemical Compositions of Deep-Sea Sediment Where Artificial Rapid Deposition Event Occurred
T. Fukushima, K. Harada, Y. Shibamoto and E. Kuboki ............................................................................ 541

RENEWABLE AND OCEAN ENERGY
A 3D Parametric Study of a Rectangular Bottom-Mounted OWC Power Plant
Y.M.C. Delauré and A. Lewis ....................................................................................................................... 548

Time Domain Control of a Single Mode Wave Energy Device
U.A. Korde, M.P. Schoen and F. Lin ........................................................................................................... 555

OWC-Caisson Economy and Its Dependency on Breaking Wave Design Loads
F. Neumann and A.J.N.A. Sarmento ............................................................................................................ 561

Optimum Control of Oscillation of Wave-Energy Converters
Johannes Falnes ........................................................................................................................................... 567

Power Quality Assessment from the LIMPET Wave-Power Station
R.G. Alcorn and W.C. Beattie ...................................................................................................................... 575

An Investigation into the Importance of the Air Chamber Design of an Oscillating Water Column Wave Energy Device
J.W. Weber and G.P. Thomas ...................................................................................................................... 581

Stress Analysis of Impulse Turbine Blades
A. Thakker, H.B. Khaleeq, F. Hourigan and J. Jarvis ................................................................................ 589

Preliminary Study on Wave Energy Utilization in Sri Lanka

Numerical Analysis of Wells Turbine Performance Using a 3D Navier-Stokes Explicit Solver
A. Thakker, P. Frawley and E. Sheik Bajeet ................................................................................................ 604

Noise Characteristics of Turbines for Wave Power Conversion
M. Takao, K. Itakura, T. Setoguchi, T.H. Kim, K. Kaneko and M. Inoue ................................................... 609

CA9: Analysis of a Stall-Resistant Aerofoil in View of Wave Power Conversion
A. Thakker, P. Frawley and E. Sheik Bajeet ................................................................................................ 614

A 3-Dimensional Numerical Simulation of Impulse Turbine for Wave Energy Conversion
Hyeong-Gu Lee, Ill-Kyoo Park, Tae-Hoon Kim, Yeon-Won Lee and Toshiaki Setoguchi ......................... 620
Experimental and CFD Analysis of 0.6m Impulse Turbine with Fixed Guide Vanes
   A. Thakker, P. Frawley, H.B. Khaleeq, Y. Abugihalia and T. Setoguchi .................................................... 625

Comparison of 0.6m Impulse and Wells Turbines for Wave Energy Conversion Under Similar Conditions
   A. Thakker, P. Frawley, H.B. Khaleeq and E.S. Bajeet ............................................................................... 630

Numerical Simulation of 0.6m Impulse Turbine for Wave Power Conversion Under Different Flow Conditions
   A. Thakker, H.B. Khaleeq and A.R. Ansari .................................................................................................. 634

Experiment on the Energy Gain of Floats-Type Wave Generator
   K. Hadano, T. Saito and M. Hashida ........................................................................................................... 638

Impulse Turbine for Wave Power Conversion with Air Flow Rectification System

POLAR AND ICE ENGINEERING

POLAR DEVELOPMENTS
Meeting the Challenges of Arctic Communications at the Summit Science Camp on Greenland’s Icecap
   Mike McKibben, John Kelly and Todd Valentic .......................................................................................... 653

Accurate Ocean Current Direction Measurements Near the Magnetic Poles
   James M. Hamilton ....................................................................................................................................... 656

Oil and Gas Exploration at the Arctic Shore: Social Issues
   Sergey V. Krivitsky, Alexander S. Tsvetsinsk, Dilizhan A. Mirzoev and Andrey S. Krivitsky .................... 661

ICING
Study of Icing Rate and Related Meteorological Parameter Distributions During Atmospheric Icing Events
   K. Savadjiev and M. Farzaneh ..................................................................................................................... 665

Extreme Value Analysis of Ice Accretion Data from Norwegian Measurement Rack Network
   Konstantin Savadjiev, Masoud Farzaneh and Svein Fikke .........................................................................671

ISO 12494 “Atmospheric Icing of Structures” and How to Use It
   Mogens H. Foder .......................................................................................................................................... 678

Aircraft Icing Forecast
   W. Fuchs and M. Lütkebohmert ................................................................................................................... 686

Numerical Modelling of Snow-Shedding Effects on a 110 kV Overhead Power Line in Slovenia
   Janez Jakše, Mohamed Thabet Al Harash and Ghyslaine McClure ............................................................ 690

Analytical Modelling of Ice Load for a Family of Dry Ice Accretion Shapes
   Krzysztof Szilder, Edward P. Lozowski and Gerhard Reuter ..................................................................... 695

JOIA (JAPAN OCEAN INDUSTRY ASSOCIATION): ICE RESEARCH
Ice and Earthquake Loads on a Structure in the Okhotsk Sea — Annual Report of the JOIA Project, FY1999
   Kazuyuki Kato, Yasumi Toyama, Yutaka Yamauchi, Tetsushi Kiyokawa, Naoki Nakazawa and Akira Kurokawa ................................................................. 700
Failure Mode of a Sea Ice Sheet – Cleavage Cracking
Hisao Matsushita, Zenji Kamio, Juntaro Ushikoshi, Masafumi Sakai, Takahiro Takeuchi, Takashi Terashima, Satoshi Akagawa, Naoki Nakazawa and Hiroshi Saeki ........................................................... 707

Ice Load Equation by Medium Scale Field Indentation Test Data
Takahiro Takeuchi, Muneo Kawamura, Masafumi Sakai, Naoki Nakazawa, Takashi Terashima, Zenji Kamio, Hisao Matsushita, Akira Kurokawa, Satoshi Akagawa and Hiroshi Saeki ........................................ 713

Wave Modification in Water Waves with the Free Surface Covered by Grease Ice
Shinya Okumura, Yukio Sato and Hiroyuki Enomoto ................................................................. 721

Physical Characteristics of First-Year Sea Ice in Notoro Lagoon: Summary of Five Years’ Field Test on Mechanical Properties
Juntaro Ushikoshi, Zenji Kamio, Hisao Matsushita, Masafumi Sakai, Takahiro Takeuchi, Takashi Terashima, Satoshi Akagawa, Naoko Nakazawa and Hiroshi Saeki .......................................................... 727

ICE COVER
Variations in Air-Ice Drag Coefficient Due to Ice Surface Roughness
S. Prinsenberg and I.K. Peterson ........................................................................................................ 733

Tide-Induced Drift Velocities and Deformations of Ice Cover on the Northeastern Shelf of Sakhalin Island
Elena Tikhonchuk, George Shevchenko and Victor Tambovsky .................................................... 739

Experimental Studies of Ice Cover Inhomogeneity
Vladimir I. Seliverstov, Sergey G. Gomolskiy and Alexander E. Farafonov ........................................ 744

ICE FORCES
Validation of Low Level Ice Forces on Coastal Structures
Joachim Schwarz .................................................................................................................................. 749

Simulations of Ice Ridge Forces on Conical Structures
B. Sand and G. Horrigmoe .................................................................................................................. 754

Loading Regime of Ice-Structure Interaction
Alexander T. Bekker, Tatyana E. Uvarova, Sergei D. Kim, Vladimir I. Seliverstov and Elizaveta A. Kharitonova ........................................................................................................................................ 761

Strength Characteristics of Hummock Formations
G.A. Surkov, V.N. Astafyev, A.M. Polomoshnov, S.V. Zemlyuk and P.A. Truskov ........................................ 770

Design of Offshore Ice-Resistant Platforms for Seismic Regions of Continental Shelf
A.V. Kotov, A.A. Malyutin, V.V. Kotov, S.L. Karlinsky and G.V. Zhukov ................................................... 775

Model Testing of an Arctic Shuttle Barge System for Loading of Oil in Ice
Sveinung Løset, Arnor Jensen, Ove T. Gudmestad, Ola Ravndal and Svein Inge Eide ......................... 779

Investigation of Extreme Ice Loads on Offshore Structures
Alexander T. Bekker, Olga A. Sabodash, Aleksey V. Venkov and Olga S. Sclueva .................................. 788

Internal Structure of First-Year Hummocks
G.A. Surkov ........................................................................................................................................ 796

Experimental Friction Coefficients Between DUT-1 Synthetic Model Ice and Materials
Zhijun Li, Guangwei Li, Yuexia Qu and Yongxue Wang ....................................................................... 799

Experimental Study of Ice Force on Combined Cone
Yuexia Qu, Yongxue Wang, Zhijun Li and Guangwei Li ................................................................. 805
PLENARY PRESENTATION

Suction Piles: Their Position and Application Today
Tor Inge Tjelta ................................................................. 1

ÅSGARD TRANSPORT

Design of the Åsgard Transport Gas Trunkline for Thermal Buckling
Per R. Nystrøm, Knut Tornes, Jan S. Karlsen, Geir Endal and Erik Levold ............................................. 7

Åsgard Gas Transport System: Precommissioning and Commissioning
Jarleiv Maribu, Christian Falck and Philip Burman .......................................................... 18

An Assessment of the Application of the Hilbert Spectrum to the Fatigue Analysis of
Marine Risers

Steady Current-Induced Drag on Piggyback Risers
Robert Olsen, Shan Huang and Nigel Barltrop .................................................... 276

Numerical Analysis of Wire Ropes Considering Coupled Extensional and
Torsional Behaviour
José R.M. de Sousa, Marcos Q. de Siqueira, Gilberto B. Ellwanger, Léa M.B. Troina, Márcio M.
Mourelle and Luís Cláudio S. Costa ................................................................ 281
Numerical Prediction of the Dynamics of a Sea-Plow System
James J. Burgess ...................................................................................................................... 288

Effect of the Selection of Mooring System on Characteristics of Platforms in Wave and Ice Conditions
E. Toropov, O. Gladkov, A. Gintovt, D. Mirzoev, A. Bolshev and S. Frolov .................................. 295

Mooring a Drilling Semi Over a Pre-Installed Riser System – West Alpha at Snorre B
Erik Falkenberg, Jun Xu, Grzegorz Odor, Simen Moxnes and Hans H. Bruu ................................. 299

Dynamic Analysis of the DICAS Mooring Configuration for Floating Systems

AUV AND UNDERWATER CONTROL

Deep and Long Range AUV “URASHIMA”
Taro Aoki, Tadahiro Hyakudome, Toshiaki Nakamura, Kenkichi Tamura, Hiroshi Ochi, Takashi Murashima, Satoshi Tsukioka, Hidehiko Nakajoh, Tadahiko Ida, Katsufumi Akazawa and Kikuo Hashimoto ................................................................. 314

Performance of a Tip-Driven Electric Thruster for Unmanned Underwater Vehicles
S.M. Abu Sharkh, S.R. Turnock and G. Draper ............................................................. 321

Integron-Based Control Architecture for AUVs
Roberto Luiz C.B. Ramos and José Reinaldo Silva ............................................................... 325

Hydrodynamic Mitigation of Washover Effects Associated with Surface-Towed Antenna Bodies
James H. Clark ......................................................................................................................... 333

Effects of Unsteady Lift and Cable Tension on Design of a Control System of a Towed Vehicle
Satoru Yamaguchi, Wataru Koterayama and Takashi Yokobiki .................................................. 339

ENVIRONMENT ENGINEERING

Oil Spreading in Cold Waters – A Model Suitable for Broken Ice
Janne K.O. Gjøsteen .................................................................................................................. 346

Design Criteria for a New Generation of Oil Skimming Vessels
Günther F. Clauss, Rolf Habel and Martin Vannahme ............................................................. 352

A Review Analysis of International and Greek Databases Concerning Oil Spills: The Case of a New Greek Oil Spill Database
Nikolas P. Ventikos, Konstantinos P. Dilzas and Harilaos N. Psaraftis ........................................ 360

Development of Oil Boom System for Stormy Weather
Eiichi Kobayashi, Yoshihara Shigeiri, Yoshiyuki Nishimura, Kiyoto Oe, Seigi Yamase and Kunihiro Ikekami .......................................................... 366

Research and Development of Oil Skimmer for Stormy Weather

Fitness-for-Purpose Failure and Corrosion Control Management in Offshore Oil and Gas Development
Jeremy C. Price ............................................................................................................................................ 234

Sour Service X65 Seamless Linepipe for Offshore Special Applications
E. Anelli, D. Colleluori, J.C. Gonzalez, G. Cumino, H. Quintanilla and M. Tivelli ......................................... 242

The Effects of Alloying Elements on Thermal Fatigue and Thermal Shock Resistance of the HSLA Cast Steels
J.H. Park, H.J. Kim and I.B. Kim ................................................................................................................ 250

Evaluation of Strength of Friction Welded 6061 Alminum Alloy Pipe Joints by Heat Input and Burn-Off Length
H. Ochi, T. Sawai, Y. Yamamoto, K. Ogawa and Y. Suga ........................................................................... 256

Hybrid Welding of Steel for Offshore Applications
Christian Walz, Ingo Stiebe-Springer, Magdy El Rayes, Thomas Seefeld and Gerd Sepold ......................... 263

Effect of Number and Size of Cracks on Fatigue Behavior of Alumina
Akira Yoshikawa, Kiyohiko Ikeda, Koichi Kaizu and Katsushige Adachi .................................................. 267

Fatigue Strength of AL-6XN Superaustenitic Stainless Steel
Brian Metrovich, Eric J. Kaufmann, John W. Fisher, Xiaohua Cheng, Ben T. Yen and Zuozhang Ma ................................................................. 272

Evaluation of Joint Strength of 6061 Aluminum Alloy Joint Welded Under Inertia Type Friction Welding by Heat Input and Burn-Off Length
T. Sawai, H. Ochi, Y. Yamamoto, K. Ogawa and Y. Suga ........................................................................... 277

The Influence of Nickel and Nitrogen on Impact Toughness Properties of Low Alloy Basic Electrode Steel Deposits
Tomasz Wegrzyn ........................................................................................................................................... 282

Automatic Control of Penetration by Monitoring Reverse Side Shape of Molten Pool in All Position Welding of Fixed Pipes
Yasuo Suga, Daisuke Takenaka, Yuto Hibikiya and Koichi Ogawa ............................................................ 286

Effect of Contact Detecting Method on Pre-Heating Time and Tensile Strength in 6061, 2017 Aluminum Alloy to SUS304 Stainless Steel Friction Welding
Katsuyoshi Morikawa, Yoshio Ohue, Ryouji Tsujino, Hiroshi Yamaguchi and Koichi Ogawa .................... 292

Finite Element Analysis of Hot Cracking Under Welding Using Temperature-Dependent Interface Element
Masakazu Shibahara, Hisashi Serizawa, Hidekazu Murakawa and Yukio Ueda ........................................... 297

Statistical Investigation for Optimum Welding Condition of 2017 Aluminum Similar Alloy Friction Welded Joints
Ryoji Tsujino, Katsuyoshi Morikawa, Hiroshi Yamaguchi, Koichi Ogawa and Hiizu Ochi ................................ 304

Fatigue Resistance of Welded Details Enhanced by Ultrasonic Impact Treatment (UIT)
Sougata Roy, John W. Fisher, Ben T. Yen ................................................................................................... 309

A Study on Residual Stress Distribution Measurement of Dual Phase Stainless Steel by Means of X-Ray Method
Xiaopeng Wei, Juwen He, Toshihiko Sasaki and Yukio Hirose ................................................................. 314

X-Ray Stress Measurement of Ni-Al SystemCoating Layer Prepared by Self-Propagating High-Temperature Synthesis Reaction
Takayuki Murotani, Juwen He, Toshihiko Sasaki and Hajime Hirose .......................................................... 319
COLLISION, MECHANICS AND EARTHQUAKE ENGINEERING

COLLISION AND IMPACT

Three-Dimensional Hydroelastic Water Entry: Preliminary Results
B. Donguy, B. Peseux, L. Gornet and E. Fontaine ................................................................. 324

Structural Response of a Thin Plate by Underwater Explosion Loading
M. Arami, T. Kakinouchi and T. Shibue ................................................................................... 331

Hydroelastic Formulation in Order to Achieve More Accurate Prediction of Hydrodynamic Loads
A. Bereznitski, B. Boon and V. Postnov .................................................................................... 337

Slamming and Whipping Analysis of Large Container Ship
Ivo Senjanovic and Joško Parunov ......................................................................................... 343

Designing for Wave Impact on Bow and Deck Structures
Ø. Hellan, O.A. Hermundstad and C.T. Stansberg ................................................................. 349

Large-Scale Experiments with Slender Cylinders in Breaking Waves
J. Wienke, U. Sparboom and H. Oumeraci ............................................................................ 358

Nonlinear Wave-Structure Interactions on Floating Production Systems
C.T. Stansberg and F.G. Nielsen ............................................................................................. 363

High-Energy Ship Collision with Jacket Legs
Jørgen Amdahl and Atle Johansen ......................................................................................... 373

FE Approach to the Ship Grounding Event
J. Kajaste-Rudnitski and P. Kujala ......................................................................................... 378

On the Design of New Material Protective Device for Ship Collision
Tokiko Takabayashi, Kuniaki Shoji, Shigeo Mita and Chisato Nonomura ............................... 385

MECHANICS AND ANALYSIS

Post-Ultimate Strength Behaviour of Long Rectangular Plate Subjected to Uni-Axial Thrust
Tetsuya Yao, Masahiko Fujikubo, Daisuke Yanagihara and Tomoyuki Murase ........................... 390

New Simplified Model for Collapse Analysis of Stiffened Plates and Its Application to Offshore Structures
Patrick Kaeding and Masahiko Fujikubo ................................................................................ 398

Experimental and Numerical Analysis of Aluminium Columns Subjected to Fire
Nina Kristin Langhelle and Jørgen Amdahl ............................................................................ 406

An Optimal Design Study on Pitched Beams
Ki-Sung Kim, Nam-Gu Kang and Hyoung-Jin Park ................................................................ 414

The Effect of Yield Stress on the Initiation of Fatigue Crack Occurred From a Round Hole
C.H. Lin, G.S. Lin and C.S. Lee ............................................................................................... 420

EARTHQUAKE ENGINEERING

A Method for Including Ovalization Effects of Tuular Member on Cross-Section Properties
H. Karadeniz ........................................................................................................................... 426

A Case Study of Applicability of Seismic Bearing Capacity Method to Open Piled Pier with Vertical Steel Piles
Takayuki Suzuki, Shigeru Ueda, Tomoyuki Ikeuchi and Makoto Ishida .................................. 433
Study on the Seismic Response of a Semi-Submerged Bridge Including the Hydrodynamic Force
Shigeru Ueda, Kazuyoshi Kihara, Koichi Inoue, Jun Hirai and Shunichi Ikesue ........................................... 441

Damages due to the Eastern Marmara Earthquake (EME) at Port Structures
Y. Yüksel, E. Çevik, Y. Çelikoglu, T. Bostan, H.I. Özmen and O. Özgüven ................................................. 447

RELIABILITY, RISK AND SAFETY

RELIABILITY, RISK AND SAFETY

Safety of Offshore Installations – Making ALARP Principle More Practicable
Chengi Kuo ..................................................................................................................................................... 452

On the Risk of Structural Failure on Norwegian Offshore Installations
Arne Kvitrud, Gerhard Ersdal and Roger L. Leonhardsen ......................................................................... 459

On the Importance of Human and Organizational Factors in Design, Construction and Installation of Engineered Systems

Use of accident and Incident Data for Safety Optimisation
Jan Erik Vinnem and Nils Helge Rorå ........................................................................................................... 475

Reassessment of Jacket Type of Platforms Subject to Wave-in-Deck Forces: Current Practice and Future Development
Katrine Hansen and Ove Tobias Gudmestad ............................................................................................... 482

Reliability Assessment of a Mooring System
Sverre Haver, Kjell Larsen and Trond Stokka Meling ................................................................................. 490

Case Study: Effects of Wind Loading on Structural Reliability
Emmanuel Fakas, Suhartodjo Tuty, Beverley F. Ronalds and Rodney Pinna .................................................. 498

Quantifying Uncertainty due to Imperfect Force Prediction Models: A General Methodology with Applications to Fluid Drag Loads
Tina Kashef, Steven R. Winterstein and Rune Torhaug .................................................................................. 503

Probability Distributions of Mechanical Damage for Offshore Marine Platforms
D. De León and E. Heredia-Zavoni ................................................................................................................. 511

Possibilistic Inspection Planning Technique Based on Fuzzy Reliability Concepts
Hari B. Kanegaonkar ....................................................................................................................................... 516

Modified FMEA for Fishing Vessels: A Fuzzy Set and Grey Theory Approach

Value and Risk: A Basis for a Balanced Performance Assessment Criterion for Maintenance in Offshore Engineering Constructions
Jayantha P. Liyanage, Tore Markeset, Jens Kørte and Uday Kumar ............................................................ 529

Expert Judgment and Risk Perception
Rolf Skjong and Benedikte H. Wentworth .................................................................................................... 537

Life Cycle Structural Integrity of North Sea Installations
A. Stacey, M. Birkinshaw and J.V. Sharp ....................................................................................................... 545
ADVANCED SHIP AND OCEAN TECHNOLOGY

Second-Order Free Surface Effect on Cavitating 3-D Hydrofoils
Sakir Bal ....................................................................................................................................................... 554

Evaluation Method of Passenger Comfort for Training Ships in Irregular Seas
Ritsuo Shigehiro, Takako Kuroda and Yoichi Arita .................................................................................... 562

Simulation of Modern Surface Ships with a Wetted Transom in a Viscous Flow
Tingqiu Li and Jerzy Matusiak ..................................................................................................................... 570

Bayesian Estimation of Directional Wave Spectra for Ship Guidance System
Toshio Iseki and Daisuke Terada ................................................................................................................. 577

Statistical Design of Fenders for Berthing Ship
Shigeru Ueda, Ryo Umemura, Satoru Shiraishi, Shuji Yamamoto, Yasuhiro Akakura and Seigi Yamase .......................................................................................................................................................... 583

Fatigue Design Method of Ship Structural Members Based on Fatigue Crack Growth Analysis
K. Terai, Y. Tomita, K. Hashimoto and N. Osawa .......................................................................................... 589

Experimental Study on Thermo-Flow Field during Gas Flame Heating
Nobutaka Shinkai, Yasumitsu Tomita, Naoki Osawa, Kiyoshi Hashimoto and Junji Sawamura .............. 595

Fatigue Strength Tests of Side Longitudinal Frames under Constant Amplitude Loading
Yasushi Kumakura, Nobu Iino, Hajime Kawano, Kouta Shibasaki and Shunichi Kawachi ...................... 602

Bulk Carrier Corrosion Modelling
C.P. Gardiner and R.E. Melchers ................................................................................................................ 609

OFFSHORE ENGINEERING EDUCATION

Engineering an Offshore Engineering Curriculum
W.W. Massie and J.H. Vugts ........................................................................................................................ 616

Offshore Engineering Education Seen from the Viewpoint of an Adjoint Professor
Ove Tobias Gudmestad ................................................................................................................................ 620

Industry-University Educational Cooperation: A University Perspective
W.W. Massie ................................................................................................................................................. 625

Industry-University Education Co-operation – An Industry Perspective
F.C. Lange .................................................................................................................................................... 628

DEEPWATER RESEARCH STUDIES

An Experimental Research Study of a Mini-TLP

Dynamic Analysis of Mooring Lines by Using Three Different Methods
Xiaohong Chen, Jun Zhang, Peter Johnson and Mehernosh Irani ............................................................. 635

Toward the Design of New Technologies for Deep-Water Anchorages

The Behavior of a Tanker-Based FPSO in Hurricane Waves, Winds, and Currents
E.G. Ward, Mehernosh B. Irani and Robert P. Johnson ............................................................................. 650
Deepwater Production System Risks
E.G. Ward, Robert B. Gilbert, Jihad Jaber and Andrew J. Wolford ........................................................... 654

THE 2ND INTERNATIONAL DEEP-OCEAN TECHNOLOGY SYMPOSIUM

Recent Progress of the Deep Ocean Technology in JAMSTEC
Hiroyasu Momma, Taro Aoki and Katsuyoshi Kawaguchi ................................................................. 660

Deep Water Production Technology and Perspectives in Brazil
Pedro José Barusco Filho and Mauricio da J.A. de Aratanha ................................................................. 664

Deep Ocean Research Activity in China
Ji-Mao Zhu ................................................................................................................................................... 668

Acoustic Systems of the AUV “URASHIMA”
Toshiaki Nakamura, Takaya Shimura, Hiroshi Ochi, Taro Aoki, Yasutaka Amitani, Kenkichi
Tamura, Satoshi Tsukioka, Takashi Murashima, Hidehiko Nakajoh, Takao Sawa and Tadahiro
Hyakudome ................................................................................................................................................... 674

The HUGIN 3000 Survey AUV
Karstein Vestgard, Roar Hansen, Bjorn Jalving and Odd Arild Pedersen .............................................. 679

Design and Deepwater Tests of MODUS – the Deployment and Recovery Vehicle for
GEOSTAR 2 – Seafloor Stations
Günther F. Clauss, Sven Hoog and Hans W. Gerber .................................................................................. 685

Improvement on the Vergence Control Mechanism of an Underwater Stereo Camera
Bong-Hwan Jeon, Pan-Mook Lee and Chong-Moo Lee ............................................................................. 693

ADDITIONAL PAPER

Repair and Structural Upgrade of R/C Columns Using Polymeric Composite Laminates
Medhat A. Haroun, Hussein M. Elsanadedy, Carla V. Yland and Ayman S. Mosallam ............................ 698
